

Alarmwise at present isn't an affiliated member of the NSI or SSAIB, though we have been a member in past. Alarmwise was the 8th member in the Kent Area with the SSAIB starting from 1996.

Your insurance may recommend that you installation should be carried out by an affiliated company this is normally after a burglary, although you will find that the installation may be more expensive and there will also be additional costs for maintaining the system from the onset of installation, which will need to be renewed annually.

Alarmwise , continues to operate with the same policy and procedures as an affiliated member, offering the same services, from the sales enquiry to survey, then on to the quotation and ordering process, right through to the system installation, commissioning and maintaining. Our Policy and Procedures can be requested.

Alarmwise is recognised manufacturer installers and all our installations are completed to the requirements of all applicable Standards, Code of Practice, etc.
